

Mrs Baker-Teaching Assistant

What I do at school

I help you achieve your targets by listening to your teacher and supporting you in class, either inside the class or outside in a small group. I listen to you read so that you get better and better at it! I take small groups for times tables fun outside the classroom too. I also help you to improve your motor skills by doing fun activities in small groups and I take a well-being group where we make things - using clay - and listen to each other about our worries. It's fun but helpful too!

I helped out in Forest School this year and at your swimming lessons. I help out at Cookery Club too. 😊

How I can help you

I can help you to focus in class, listen to you read, make learning times tables fun, help you improve your motor skills and teach you how to do pottery in a small well-being group. I am there to talk to if you need to chat.

What I like to do at home

I really enjoy cooking and baking, especially muffins! We have an allotment and I am growing some fruit and vegetables. They need a lot of watering! I do my pottery at home too. I love it! I also make sure I have fun with my family and we go camping together in the countryside and at the seaside.

Some of my favourites...

I love baking cakes, doing pottery and swimming, but not at the same time!!

I also love making and eating pizza 😊

Other interesting things about me

I'm married to Mr Baker and we have a son called Frank. He's 16! I have lived in France, Spain and Portugal and really enjoy speaking in different languages and learning about other countries and their culture. My dream is to go to Brazil one day!!!
